DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 6, 2004 has been entered.

Election/Restriction

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-13, drawn to a system of electrical communication by means of network signaling, classified in class 340, subclass 286.02.
 - II. Claims 14-26, drawn to a method of apparel pattern grading, classified in class 33, subclass 17A.
 - III. Claims 27-30, drawn to an electronic shopping system comprising an arrangement for presenting an image or description of a sales item (e.g., electronic catalog browsing), classified in class 705, subclass 27.

3. The inventions are distinct, each from the other because of the following reasons:

Ĺ

Invention II is related to each of Inventions I and III, as process and apparatus for its practice. The inventions are distinct if it can be shown that *either*: (1) the process as claimed can be practiced by another, materially different apparatus, or by hand, *or* (2) the apparatus as claimed can be used to practice another, materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another, materially different apparatus, or by hand, such as, by hand.

Invention III is related to Invention I as combination and subcombination. Inventions in this relationship are distinct if it can be shown that: (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In this case, the combination as claimed does not require the particulars of the subcombination as claimed, because a system in accordance with Invention III need not include determining to which category in a pre-set classification of goods the customer belongs. The subcombination has utility by itself, such as for use in selling just clothes without selling any food products.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

- 5. A telephone call was placed to Mr. Alexander V. Yampolsky (Reg. Nº 36,324), attorney for applicant, on October 5, 2004, to discuss an oral election to the above restriction requirement, but the call did not result in an election being made.
- 6. Applicant is advised that the reply to this requirement, to be complete, *must* include an election of the invention to be examined, even if the requirement be traversed (37 CFR 1.143).

Conclusion

7. Any inquiry concerning this communication, or earlier communications, should be directed to the examiner, **Jerry O'Connor**, whose telephone number is (703) 305-1525, and whose facsimile number is (703) 746-3976.

The examiner can normally be reached weekdays from 9:30 to 6:00.

Inquiries of a general nature or simply relating to the status of the application should be directed to the receptionist, whose telephone number is (703) 308-1113.

If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Mr. Robert Olszewski, can be reached at (703) 308-5183.
